

## **PRESS STATEMENT ON ENHANCED SECURITY FOR WATER TANKS**

Arising from the water tank incident at Block 686B Woodlands Drive 73, many residents have raised concerns on the security system of water tanks.

The PAP Town Councils would like to assure our residents that there is a proper security system in place.

Currently, there are two levels of security control to the roof top and water tanks:

- (1) The water tanks at the roof top are secured with locks. In addition, access to roof top is also secured with lockable door.
- (2) The issuance of keys is restricted to authorised personnel for maintenance and emergency work.

To further enhance our current security system, the PAP Town Councils will adopt additional security measure by allowing only authorised Town Council staff and our Emergency Unit (EMSU) to have access to the water tanks.

The PAP Town Councils will continue to further enhance the security of the water tanks and roof access to better serve our residents.
